Installation, Configuration, and Usage

Installation

- [Installing Jupyter Notebook \(../install.html\)](#)
- [Upgrading Jupyter Notebook \(upgrade-notebook.html\)](#)
- *Optional:* [Installing Kernels \(../install-kernel.html\)](#)

How do I decide which packages I need?

Note:
Green ringed shapes are links on this site and open in this window
Blue ones are links to external sites and open in a new tab/window.

Configuration

- The **jupyter** Command ([jupyter-command.html](#))
- Common Directories and File Locations ([jupyter-directories.html](#))
- Jupyter's Common Configuration Approach ([config.html](#))

Usage and Projects

- Jupyter Projects ([subprojects.html](#))
- IPython Projects ([ipython_projects.html](#))
- Incubator Projects ([incubator.html](#))
- Kernels (Programming Languages) ([kernels.html](#))
- Project Documentation ([doc-proj-categories.html](#))
